

NEW

Four versions. Aluminium material. Berner drive systems.

## Supeero Swing gates

This brochure is currently being updated and will soon be available under the name Berner swing and sliding door series live.

## For a beautiful entrance

First-class quality, modern design, reliable automation.

The new Berner swing gates are launched in four different versions. The basic material, aluminium, is weather-resistant and durable. The design is timeless and combines simple elegance with maximum efficiency in conjunction with the matching automation variants.

The modern gates adapt to any environment and guarantee your safety and the protection of your property. The excellent price-performance ratio makes Berner swing gates an attractive solution that always works perfectly, even on difficult terrain and with wide driveways.

Extensive accessories give you the option of operating the swing gates with hand transmitters, code switches or via app. The optional safety devices make the operation of the entrance gates even safer.

Gate filling positioned centrally in the frame  
optic: vertical panels, width 100 mm distance  
80 mm (in-between the panels)

➤ Swing gate in fence look vertical panels

Gate filling positioned centrally in the frame

## Berner swing gate openers – for every area of application

The Berner swing gate openers in 24 V technology are suitable for both private and commercial use. They are permanently weatherproof and absolutely maintenance-free. They open and close your entrance gate quietly and reliably in any weather and in any situation. Smooth running and absolute safety are a matter of course.

### The swing gate opener **DA22**

For 1-leaf and 2-leaf gates

Max. gate weight: 220 kg

Max. width of gate leaf: 2,5 m

### The swing gate openers **DA42 DA42-L**

for normal width and extra wide  
1-leaf and 2-leaf gates

Max. gate weight:  
DA42: 400 kg · DA42-L: 400 kg

Max. width of gate leaf:  
DA42: 2,5 m · DA42-L: 4 m

### Optional:

### The swing gate openers **DA200SA DA300SA**

Electromechanical swing gate  
opener in compact design for 1-  
and 2-leaf swing gates with large  
post dimensions

Max. gate weight:  
DA200SA: 200 kg · DA300SA: 300 kg

Max. width of gate leaf:  
DA200SA: 2 m · DA300SA: 3 m

## The matching accessories – according to your wishes

Select the right accessories for you from our large range. Whether operation by radio or with wired command devices, you have the free choice.

### Transmitters – new design

The 1-, 2- and 4-channel transmitters BDS210, BDS220 and BDS240 are particularly secure and feature a bidirectional coding procedure (BiSure). The BiSure technology also enables the door status query (BDS220 and BDS240) at the push of a button.

### Radio code switch 10-channel, illuminated

BDS690, IP54,  
with membrane keypad,  
black housing,  
battery 2 AAA, 1.5 V

### Radio code switch 10-channel, illuminated

BDS691/BDS691-W, IP54  
with stainless steel keypad,  
white or black housing,  
battery 2 AAA, 1.5 V

### Radio inside push-button 2-channel

BDS624/BDS624-W,  
housing white or black,  
battery 2 AAA, 1.5 V

### Radio inside push-button 6-channel

BDS664/BDS664-W  
with status indication,  
housing white or black,  
battery 2 AAA, 1.5 V

### One-way photocells

EL301, IP65, 24V, incl. testing

### Flashing lights

BLO, LED flashing light, flashing or  
steady light adjustable

### Emergency stop switch on wall

NAG, in housing, IP54

### Main switch on wall

HSG, all-pole disconnecting, IP54

# Swing gates according to individual requirements

Supeero swing gates are supplied in 26 predefined RAL colours as standard – see page 8. In addition, further RAL colours are available as an option and at an extra charge.

Prices without automation and security package.

All gates are 2-leaf, 1-leaf gates and asymmetric gates on request.

Including universal fastening profile with 3x hinges per leaf and buffer stop.

# Installation situation on site

## Option A: Fastening to existing masonry or posts

With the standard fastening, a masonry or post is already present and the universal fastening profile can simply be fastened to it. The costs for the standard fixing are already included in the offer. Please note that for this option, in the case of automation, the post width and dimension C (see drawing) must be specified in the enquiry form.

## Option B: Fixing without existing masonry or posts

If there is no masonry, post or similar fastening for gate assembly on site, we will supply you with suitable gate posts. All our fixing posts (base area 180 x 180 mm) are made of indestructible aluminium and in the identical RAL colour as the entire gate system and the associated gate leaves. The fixing post can be set in concrete or mounted on an existing foundation (with a mounting sleeve). If the fixing post is set in concrete, the length of the post increases (clear height + 60 cm, see point 6 Enquiry form, page 1).

# Standard RAL overview

Supeero swing gates are supplied in 26 RAL colours as standard, which you can select freely from our RAL colour palette. This leaves almost no colour wishes unfulfilled and your new swing gate will match the architecture and colour scheme of your house perfectly. And for all other colour wishes, we offer the entire RAL colour world as an option and for an additional charge.

RAL 1015	RAL 1019	RAL 3005	RAL 5003	RAL 5014
RAL 5023	RAL 5024	RAL 6005	RAL 6009	RAL 6021

Enquiry form Supeero swing gates / Page 1

Option A

Option B

1. Information on the gate

Please enter the following dimensions in the drawing:

Total width gate opening (GT) in mm: \_\_\_\_\_

- ☐ 1-leaf
- ☐ 2-leaf
- ☐ Fittings left
- ☐ Fittings right
- ☐ asymmetrical
- Leaf 1 in mm \_\_\_\_\_
- Leaf 2 in mm \_\_\_\_\_

Clear height (LH) in mm: \_\_\_\_\_

Opening direction: ☐ inwards ☐ outwards

2. Surface colour

- ☐ Powder-coated according to 26 predefined RAL colours. Desired RAL colour: \_\_\_\_\_

All other RAL colours on request (at an extra charge): RAL \_\_\_\_\_

3. Operation:

- ☐ Motorisation incl. security package
- \_\_\_ Openings per hour \_\_\_ Openings per day
- ☐ Electric lock 24V for floor locking (recommended from a leaf width of 1,500 mm)
- ☐ Manually operated

4. Radio equipment

- ☐ Yes ☐ No
- Transmitters: \_\_\_\_\_ Pieces
- (1x hand transmitter is included in the opener set)

5. Control elements

- ☐ Key switch in-wall
- ☐ Key switch on-wall
- ☐ Push button for internal use
- ☐ Push-button for external use
- ☐ Radio code switch
- ☐ Miscellaneous: \_\_\_\_\_

6. Fixing post aluminium (option B):

- ☐ Additional fixing post leaf 1
- ☐ Is set in concrete LH + 60 cm
- ☐ Incl. mounting sleeve
- ☐ Additional fixing post leaf 2
- ☐ Is set in concrete LH + 60 cm
- ☐ Incl. mounting sleeve

The fixing post reduces the leaf width by 155 mm per leaf.

7. Side door (matching the gate)

- Height in mm: \_\_\_\_\_ Width in mm: \_\_\_\_\_
- Opening direction seen from inside
- ☐ right ☐ left
- ☐ opening inwards ☐ opening outwards
- ☐ Electric door opener ☐ Mechanical door closer
- ☐ With 1 door handle + 1 knob
- ☐ With 2 door handles

If you would like a side door, please send us a drawing or sketch/photo and the installation situation, e.g. existing pillars, columns, etc.

We keep  
you moving

Berner Torantriebe has been a leading manufacturer of garage door openers for more than 60 years. Our extensive product portfolio includes garage door-, battery-solar door-, underground car park-, swing and sliding gate openers as well as Cantilever Systems, barriers, parking space barriers, bollards and a wide range of accessory for all our product areas.

Supeero, a Berner Torantriebe brand since 2017, stands for high-quality entrance gates, Cantilever Systems and Composite Frame Systems made of aluminium. The "Suspended Glass" is a unique product in the sliding gate sector.

All Berner products are manufactured exclusively in Germany, meet the most diverse customer requirements and offer practice-oriented and modern solutions.

First-class quality and the reliability of Berner products, which comes with it, are ensured by using selected components, endurance testing and careful final inspection in our company.

In addition to our customer-oriented service, this has been the recipe for success since the company foundation and the most compelling reason for a successful cooperation with our customers.
